

# GET WHAT YOU WANT OUT OF LIFE

These hand painted metal flake helmets come from sunny California. (It should be Colourfornia.)

They're not only eye-catching, but they pass BS2495(HP)1977 comfortably.

But what else would you expect with four tough layers of glass fibre and a 25mm thick styrafoam inner lining, to say nothing of a shatter-proof Lexan® visor?

At just under £40, they're at the top end of

the Life range of over forty helmets.

But no matter which Life helmet you fancy, plain or decorated, full face or jet - no matter if it costs a mere £10.99 - it's sold with a free replacement guarantee against accident damage.

That's one of the joys of Life.
