

THE PHOENIX HAS RISEN

At the top of the Stadium tree, proud and content in his infinite superiority, sits the Phoenix, master of all he surveys. There's nothing like being approved to B.S. 2495:1977 for that feeling of contented security. And conforming to RAC racing requirements means he can fly in competitive events. Just to make sure he doesn't get burnt again, he meets the newest RAC flammability clause and for an added touch of elegance he parades the ACU emblem.

Superior he is, maybe even conceited. But when it comes to the price at which he sells himself - he's really quite modest.

No. 277 Phoenix - in glass fibre with shatterproof anti-mist shield.

The other helmets in the Stadium range are also worth looking into:

Project 9 B.S. 5361 A.C.U. Stamped

Project 7 B.S. 5361 A.C.U. Approved
