

POWER YOUR WAY TO THE TOP

Konica FT-1 MOTOR

The product of KONICA's pioneering camera technology – the FT-1 incorporates a built-in power winder, creating a lightweight (745g) package of efficiency. The integrated direct drive motor powers the film transport plus Konica's auto-load system, making it one of the fastest loading and quietest SLR's available. The exposure system features automatic or manual option with exposure lock and exposure ± 2 compensation dial. Single or continuous frame selection with film advance of 2 f.p.s.

The accessory terminal allows electronic connection of cable releases, radio control, interval timer or left-hand release.

Dedicated flash with Konica X-24 or X-36 flashguns.

KONICA LEADING THE WAY

See your nearest photographic retailer or write to the distributors for further information.
