

IF YOU'RE PLANNING ON BEATING THESE GUYS, MAKE SURE YOU'RE ON DUNLOP.

A daunting question, but if you're aiming for the top in Australian motocross in 1981, this is just part of the opposition.

So while you're planning the attack, bear in mind that Gunter, Gall, and Williams, to name just three, will all be armed with Dunlop grip-power.

With three rear and two front patterns to choose from, there is a Dunlop motocross tyre

specifically designed for the terrain of the day. Hard or Soft compound. For dry, wet, or very wet going.

Enduro riders have it just as good. Select the correct Dunlop for the job, and it's basically up to you and the bike from there.

Dunlop took first and second places in the 1980 Mr Motocross Series. It was part of the plan to give you a competitive edge this year.
