

Dirt Riders... The Gods have smiled upon you!

LAZER[®] MX

The Gods of the road have been blessed for long enough. At last Lazer has created the MX and the long ignored dirt rider need pray no more. Lazer MX is made in Belgium from RONFALIN, a revolutionary new material developed by Lazer, specifically formulated for its strength, lightness and ability to resist the effects of grease, petrol fumes and ageing. The result is an extremely lightweight helmet that keeps its good looks and toughness.

Besides its superior lightweight and comfort, Lazer MX features an open vent system, allowing you to keep your head cool (even with the visor lowered). Also available for Lazer MX is an optional visor enabling you to have the best of both worlds, off-road and road. Lazer MX also features an integrated peak.

Yellow, Blue, Green

White

LAZER MX, The Gods indeed have smiled upon you!
