

FANCY FOOT WORK

Every time you ride, you have to perform some pretty intricate manoeuvre. So we developed a boot that's got some pretty intricate features to match: The AXO Turbo 139.

FANCY FREE. WITHOUT THE FOOT LOOSE.

Because your foot and ankle

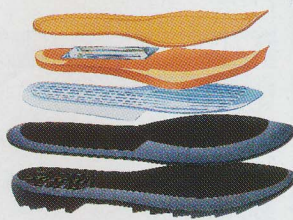

rotate up, down, and side to side, they're vulnerable to injury. But since you can't sacrifice protection for

flexibility - or vice versa - the Turbo 139 gives you both. So you have freedom of movement without a boot that's two sizes too large.

WE'VE BEEFED UP THE OLD SOFT SHOE.

Inside there's extensive

padding, thick enough to protect, yet supple enough to flex. The "tapered ankle" fits snugly around your foot, but still accommodates your calf, pants, and pads. Our speed-lacing system extends an extra 1 1/2" for tighter security.

STRAP IN BEFORE YOU STEP OUT.

Outside there's a wide strip Velcro® fastener and three quick-lock buckles for perfect adjustment. Pliable top-grade leather. Lightweight, water-proof Fibrelyte.

And heavy-duty

stitching, solid steel rivets, and detailed finishes every step of the way.

WHO ELSE HAS THIS MUCH SOLE?

The Turbo 139's inner sole is leather laid over plastic. A polyurethane insert mates to a contoured steel shank. Then we add a heavy-duty rubber liner. Finally, the rugged, multi-density bottom layer itself. Any more sole, and this boot's headed for Dixieland's Hall of Fame.

The AXO Turbo 139. Footwork that's every bit as fancy as yours. At a price that doesn't make you foot the bill.

\$290

Available in Blue, Red, Black, White. Sizes: 6-13.
