

BELL

MOTO-4

MAGNUM 4-DT

MOTO-3

THE BOSS.

Ever since we made our first helmet, we've been producing the finest helmets money can buy.

That's because the most important part of your body is your head.

Which makes your helmet the most important part of your riding equipment.

That's why Bell is Boss.

Second rate just isn't good enough.

MOTO-3

Bell's proven performer has been upgraded with a new style fibreglass shell design, increased facial venting, a new adjustable peak and improved, more comfortable interior. Wide eye port, with plenty of face clearance. It meets the world's toughest standard - Snell '85. To let you know it's new, new graphics are used.

**YOU WANT
THE BEST.
WHY SETTLE
FOR LESS?**

MOTO-4

This is the latest generation in ultimate Bell off-road protection. Lightweight fibreglass shell, full facial as well as "Force Flow" scalp ventilation, and a removable, washable liner. This helmet not only meets Bell's tough standards, but also those of the best riders around the world.

MAGNUM 4-DT

Based on the brilliant Moto-4, with an open-face design for maximum airflow. Extra cheek protection. Made to the same exacting standards that set Bell helmets apart from the rest.

**Bell helmets meet or exceed
all recognised safety standards.**
