

DUKATI

Lays it on the line

Ducati more than any other manufacturer in the world create motor cycles to be appreciated by the sporting rider. Their long graceful lines combined with the right degree of aggression create an art form in motor cycle design few can emulate.

Ducati's unique desmodromic valve system almost totally eliminates bounce - a feature that many over enthusiastic riders have been very grateful for.

However Ducati models are so reasonably priced that the full quality of the specification is often overlooked. Depending on the model you choose you can find electrics by Bosch or Nippon Denso. Suspension by Marzocchi or Ceriani, Brakes by Brembo - in fact recognisably the finest available equipment is used to complete what must be the world's finest handling motorcycle.

With fuel at record prices can you ignore the real value in terms of performance and economy a Ducati gives its owner. Whichever way you look at it, Ducati lays it on the line.
