

MOTO GUZZI

MOTO GUZZI QUALITY - for the young at heart

To the Italians motor cycles are not just another product, they are a passion, and a way of expressing their love of speed, engineering and art. They are also a very practical people, for like all Europeans, they are only too well aware of the rising costs affecting the modern motor cyclist.

In making the new V50 II we believe Motor Guzzi have managed to blend exciting performance with miserly fuel consumption - engineering flair with practical maintenance, and classic design with beauty and elegance. Compared to most 500c.c. machines, the little Guzzi is lower, lighter, more economical, and with the integral braking system, probably safer than any machine in its class. Why not check out the new V50 II today at any one of our dealers.

P.S. We don't have hundreds of dealers selling our products, but we do have 75 dealers throughout the UK supporting the sale of our motor cycles.
