

# HOW TO CLEAN UP YOUR ACT IN THE DIRT.

Lightweight Yamaha super jersey keeps you cool when things get hot. The material is a 50% cotton, 50% polyester blend.

Custom grips and levers are durable and help improve comfort and control.

Rugged Yamaha gloves give plenty of protection and come in many styles, each designed to fit like (what else?) a glove.

Nylon Cordura pants are cool and lightweight with full saddle seat, removable knee cups and heavy-duty shin guards.

Chain and cable lube is dirt and water resistant. It penetrates deep to prevent rust and corrosion. Use it regularly with a Yamaha Power Cable Injector.

Fork and shock oil resists foaming, rusting, oxidation, wear, seal cracking, swelling and drying. And lubricates suspension components for peak performance.

Goggles and helmets. Your Yamaha dealer has standard and super competition goggles — and a variety of regular and full-coverage helmets that not only meet '75 Snell standards for safety, but Yamaha standards for style.

For any other off-road extras, from loading ramps to bungi cords, see your Yamaha dealer. He has the proven parts and accessories to make your stay in the wilds a pleasant one.

CIRCLE NO. 56 ON READER SERVICE PAGE.

Premium Yamalube R 2-cycle racing oil turns engine performance on, off the road. It fights combustion chamber grit and guarantees clean, high-temp lubrication whatever kind of dirt you put your bike through.
