

WANT WORKS POWER? JUST PLUG THIS IN.

Q:
DOESN'T THE
FACTORY SUPPLY
THE BEST IGNITION?

A: Yes, but only to factory team riders. Others, who ride stock bikes, are equipped with their stock ignition. When developing ignition systems for stock bikes, the factory must take into consideration a broad range of conditions. Result: a stock ignition that delivers average performance.

Q:
HOW CAN ROOST
BOOST PLUS™
HELP?

A: Roost Boost Plus™ is pure "works" equipment. It's a plug-in module that changes the shape and duration of the spark

to deliver maximum performance. Roost Boost Plus will improve power, throttle response and starting without overloading the ignition system. And while Roost Boost Plus has been called it one of the industry's best kept secrets, over 25,000 enthusiastic riders are using Roost Boost Plus as their secret advantage.

Q:
WILL
ROOST BOOST PLUS
WORK WITH OTHER
MODS?

A: Roost Boost Plus will improve the performance of your bike - no matter how stock or tricked out it is. It will help you get the absolute maximum out of all the other "good stuff" from high octane fuel to high end engine mods.

For high performance products, there's only one Answer.
