

We went looking for trouble and found Bob Hannah.

When we design Goodyear Eagle dirt tires, we go looking for trouble. Our engineers test tires in the lab and at our Texas Proving Grounds. Then top riders like Bob Hannah get a chance to work them over.

Bob is the winningest rider ever in national competition. So, when he talks tires . . . we listen.

All of our Eagle dirt tires have been tested and improved with the help of top riders. That's what helps make our tough M/X II, D/S II and D/T II winners.

When the world's number one tire company works with the world's number one riders, you know what kind of tires will come out.

So if you're looking for great dirt tires, go with the Eagles from Goodyear. And remember, we go looking for trouble so that you won't have to. Front and rear, Eagles are built for the way you ride.
