Roadrunners make light

Every enthusiast relishes the blood-curdling top-end power of the true superbike. His only worry is how to translate that wrist-wrenching, heavy metal power into road performance.

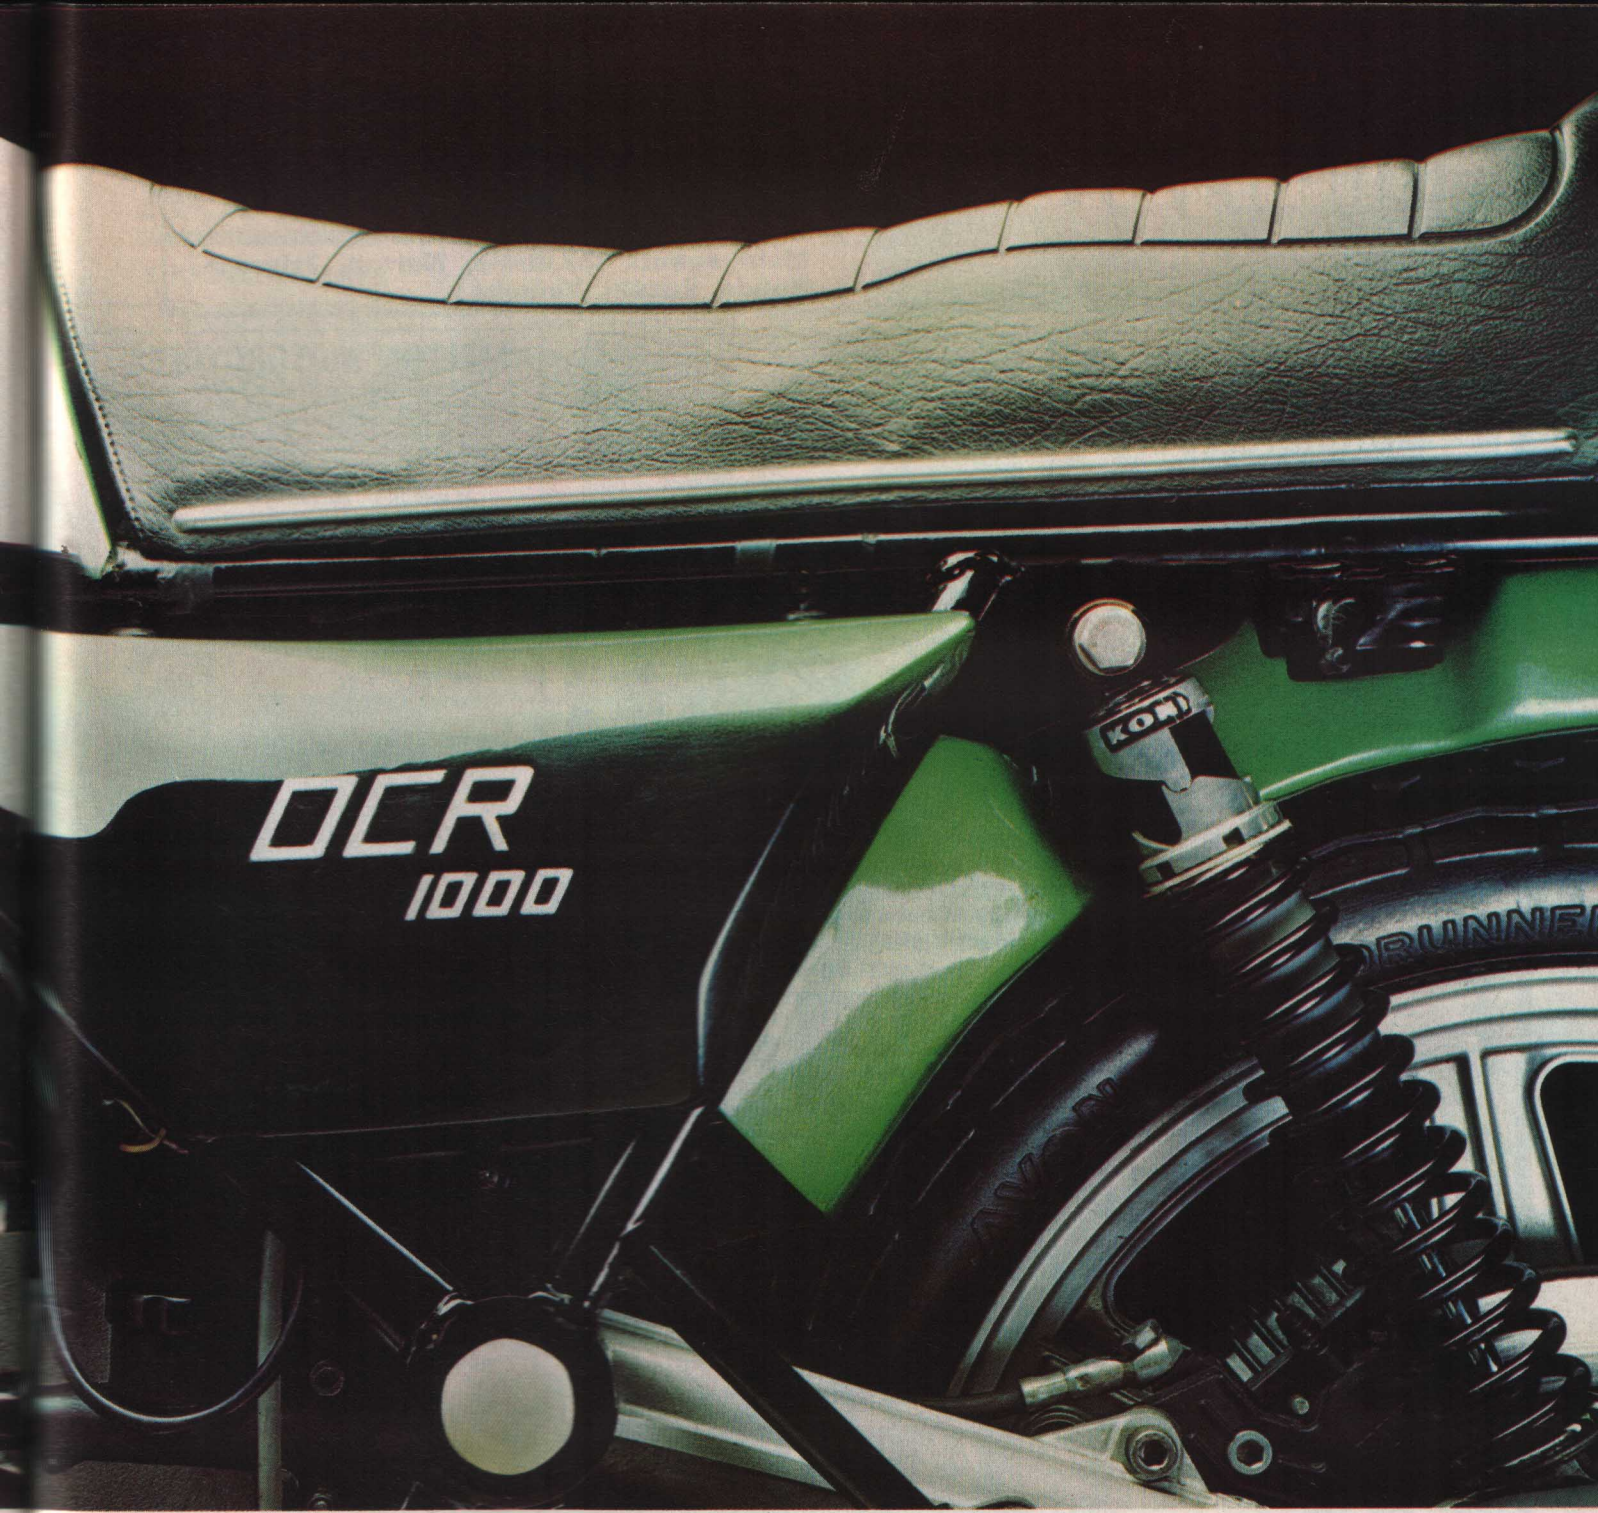

Roadrunners are H-rated, 130 MPH tyres you can take to the limit of even the Desmo's, the Le Mans's, and the R90S's. For these ultimate performance bikes, Roadrunners deliver the ultimate in control. Not only through corners, but on braking and under full acceleration too.

Roadrunners are able to do this because of

painstaking research and development by Avon, a company whose motorcycling reputation is founded on 32 World Championships and 77 World Records.

Roadrunners are low-profile tyres, made from Avon's amazing high hysteresis 'cling rubber' compounds. So with all that Roadrunner rubber gripping the road, you'll have the confidence to lay a superbike right over.

Roadrunners deliver durability as well as performance. Their reinforced shoulder blocks

work of heavy metal

minimise shoulder wear, and the classic tread pattern, moulded from wear-resistant rubber compounds, ensures long life. In fact, riders have found that Roadrunners deliver up to 50% more mileage than competitive tyres.

Roadrunners are suitable for both front and rear fitment on the majority of roadsters. So why don't you check them out at your local dealer now? Roadrunners aren't cheap, but they are priced within the reach of your pocket. And they could make all the difference to your bike.

Roadrunner sizes

16"	17"	18"	19"
5.10 H 16	3.10 H 17	3.60 H 18	3.60 H 19
		4.10 H 18	4.10 H 19
		4.25/85 H 18	
		4.70 H 18	
		3.10 H 18
