

If you want to get in and out of town a bit sharpish, here's the code: GT250X7.

Of course there are other 250's. But there's only one GT250X7—and Suzuki make it.

Suzuki make it go so quickly that top speed nudges 100 mph.

Suzuki make it stop swiftly because it boasts beefy 10" discs up front and

weighs a lean yet muscular 272 lbs.

Suzuki make it so well balanced that it takes the curves like a midget high speed train.

Suzuki make it with an unburstable "Power-Reed" engine. Pointless ignition. 6-speed gearbox. Alloy wheels. Climb aboard. For £765

you can shrink the big city.

GT 250 X7 £765

inc. vat.
