Stand back a little, and slowly and deliberately look at the Laverda RGS 1000.

Here are all the elements of a Motorcycle integrated to create a form of flowing unbroken lines. A form of Excitement.

Now, come nearer. Run your hand across the length of the Motorcycle. The sides of the fairing blend into the petrol tank. Feel that tank. Not even the blemish of a cap.

Follow the styling concept rearward, across the large side covers, to the sculptured tail section. Beautiful.

Now, sit on it. The Motorcycle is now a natural extension of your body, your personality. And you, an extension of it's body, it's personality.

This Motorcycle has spoken to you in terms of emotions and sensuality.

Laverda. The Motorcycle.
