

IntegralNava 2: Engineering Brilliance

The IntegralNava 2 has become the world's best selling helmet because of its exquisite styling, outstanding technical features, and exceptional comfort:

The IntegralNava 2 taught the helmet world the meaning of styling. From its sleek, aerodynamic shape to its clean, fully recessed visor, it is the

absolute pinnacle of achievement in form and function.

The automatic visor adds further to comfort and convenience.

From the fully open position the visor moves to a vertical position

at about 25 MPH. At 55 MPH, it closes fully to form a smooth protrusion-free "Flo-line" to minimize noise and wind resistance.

The IntegralNava 2's light weight, aerodynamic shape, and amazingly quiet fit make it the perfect helmet for those all-day rides.

The fact is, the IntegralNava 2 is so well engineered and so technically refined that it actually fits like a part of your head. That's why only a Nava feels like a Nava.
