

HONDA VF750FD **RACE BRED RACE PROVEN**

**BASED ON HONDA'S WORLD
DOMINATING RS1000RW RACER
— A RACE BRED, RACE PROVEN
V4 PERFORMANCE MACHINE.**

POWER YOU WON'T BELIEVE

The explosive power that thunders from the ultra-slim, ultra-compact, DOHC, 16-valve, liquid-cooled, 90° V4 engine makes the VF one of the fastest accelerating production 750's ever developed for the road but, because it's a 90° V, with perfect primary balance, the VF is one of the smoothest machines you'll ever ride.

The phenomenal power is produced by the brilliant use of liquid-cooling to provide stable operating temperatures, a totally new combustion chamber and "squish" area design and a completely new, dual downdraft carburettor system. Instant throttle response is available from idle to redline.

DOWNSHIFT THE NEW WAY

The VF also features the same unique One Way Clutch mechanism developed and proved in the RS1000RW. This race-bred system brings a totally new engine degree of smoothness to downshifting at any speed. It can help to make you a better rider.

To reduce weight to the minimum, computer analysis was used right from the start of frame design. The result is a compact, light but incredibly strong, box-section tube unit.

STATE-OF-THE-ART SUSPENSION

To get the power to the road and keep it there, suspension must more than equal the engine's enormous output so you'll find the VF uses Honda's Torque Reactive Anti-dive Control system at the front combined with 39 mm, flex-free, air-assisted forks and a cast alloy fork brace.

Pro-link, Honda's world-famous progressive linkage rear suspension features 4-way rebound damping and 120 mm axle travel.

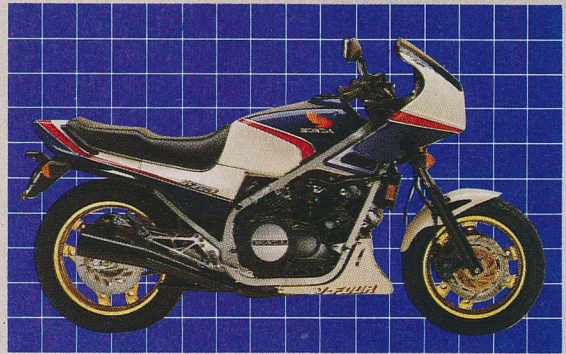

Naturally, as you'd expect on any true performance motorcycle, triple disc brakes are used but they're far from ordinary. The disc rotors are special lightweight units with dual piston calipers and at the front, the rotors are spirally grooved and use special sintered metal pad material.

Far from ordinary too is the VF's styling — from the Boomerang Comstars to the frame mounted fairing, Honda's VF750F shows its breeding superbly.

The VF750F performs as well as it looks, looks as good as it performs.
