

City streakers

On your left: the Suzuki GT 200X5.

On your right: the Suzuki GT 250X7.

Both very potent bikes with all the pzazz of much hairier machinery. (But with slightly fewer cc's, the X5 is lower to insure.)

If you flip through a pile of motorbike mags you'll find page after page of praise for these Suzuki twins.

Not just for the way they perform. (The 250X7 nudges 100 mph.)

Not merely for the comprehensive way they're equipped. (How many 200s have pointless electronic ignition plus electric *and* kick.start?)

The loudest applause comes for the immaculate way these bikes handle.

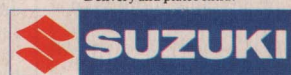

Flick them through the bends. Sneak them through the back doubles.

Point them at the hills. (6 speeds with the X7, 5 with the X5.)

Truly, these are inspired machines. Ride the blazing saddles. At the sign of the hot red 'S'.

GT 250X7, £820 inc.VAT.
GT 200X5, £699 inc.VAT.

Delivery and plates extra.
